

SPC Receives SOC 2 Type II Attestation

Independent Audit Verifies SPC's Internal Controls and Processes

Niles, IL – Specialty Print Communications, (SPC), a direct mail & digital solutions provider, today announced that it has completed its SOC 2 Type II audit, performed by [KirkpatrickPrice](#). This attestation provides evidence that SPC has a strong commitment to security and to delivering high-quality services to its clients by demonstrating that they have the necessary internal controls and processes in place.

A [SOC 2 audit](#) provides an independent, third-party validation that a service organization's information security practices meet industry standards stipulated by the [AICPA](#). During the audit, a service organization's non-financial reporting controls as they relate to security, availability, processing integrity, confidentiality, and privacy of a system are tested. The SOC 2 report delivered by KirkpatrickPrice verifies the suitability of the design and operating effectiveness of SPC's controls to meet the standards for these criteria.

"SPC is committed to meeting the highest industry standards for data & information security", stated Adam LeFebvre, SPC President. "Our clients need to trust that we are able to protect their information. We believe this achievement is absolutely required in today's data-centric business environment."

"The SOC 2 audit is based on the Trust Services Criteria," said [Joseph Kirkpatrick](#), President of KirkpatrickPrice. "SPC delivers trust-based services to their clients, and by communicating the results of this audit, their clients can be assured of their reliance on SPC's controls."

About Specialty Print Communications
